

# NAGA KRISHNA SAI PRAKHYA

Hyderabad, Telangana 500044 ◊ +91 7013364124 ◊ krishnasaiprakhya@gmail.com

Computer Science and Engineering, NGIT  LinkedIn  Portfolio  GitHub

## EDUCATION

|  |                                     |
|--|-------------------------------------|
| <b>Industry Ready Certification in Full-stack Development</b><br>Nxtwave Disruptive Technologies       | <b>2022 - Present</b>               |
| <b>Bachelor of Engineering in Computer Science</b><br>Neil Gogte Institute of Technology OU, Hyderabad | <b>2022 - 2026</b><br>CGPA: 8.94/10 |
| <b>Higher Secondary (Physics, Chemistry, Maths)</b><br>Narayana Jr College, Hyderabad                  | <b>2020 - 2022</b><br>98.6%         |
| <b>Secondary School Certificate</b><br>St. Anthony's High School, Hyderabad                            | <b>2019 - 2020</b><br>CGPA: 9.8/10  |

## TECHNICAL SKILLS

|                                  |  |
|----------------------------------|--|
| <b>Languages</b>                 | C, Java, HTML/CSS, JavaScript, TypeScript*, Python, SQL    |
| <b>Frameworks</b>                | Next.js, React.js, Express.js, Tailwind CSS, Flask, Redux* |
| <b>Tools</b>                     | Git/GitHub, VS Code, GitHub Actions, Google Colab          |
| <b>Databases</b>                 | MongoDB, SQLite*, PostgreSQL*                              |
| <b>Machine Learning &amp; AI</b> | ANN, CNN, Generative AI                                    |

## WORK EXPERIENCE

|  |   |
|--|---|
| <b>Carvia</b><br><i>Full-stack Developer</i>   | <b>Jan 2025 - March 2025</b><br><i>Remote</i> |
| <ul style="list-style-type: none"><li>Developed a full-stack web application using the MERN stack and TypeScript with Tailwind CSS.</li><li>Designed and implemented RESTful APIs with Node.js and Express.js for seamless data integration.</li><li>Integrated JWT-based role authentication to enhance security and user access control.</li></ul> |   |

## PROJECTS

|   |                       |
|---|-----------------------|
|  <b>Automated Redaction System</b>   | <b>October 2024</b>   |
| <ul style="list-style-type: none"><li>Built a Next.js and TypeScript-based redaction tool with MongoDB integration to securely store and process sensitive data in images and PDFs.</li><li>Developed a U-Net-based image segmentation model using Keras to identify and mask logos and signatures in images (referenced from U-Net Research Paper, 18 May 2015).</li><li>Fine-tuned a transformer-based Named Entity Recognition model to identify sensitive content in text and images.</li></ul> |                       |
|  <b>Facial Verification System</b>   | <b>January 2024</b>   |
| <ul style="list-style-type: none"><li>Created a facial verification system using Siamese Neural Networks with Keras and TensorFlow.</li><li>Preprocessed a dataset of facial image pairs to train and optimize the model for identity matching.</li><li>Achieved 92% accuracy in verification tasks through hyperparameter tuning.</li></ul>  |                       |
|  <b>Optimization of Doctors Availability</b>   | <b>September 2023</b> |
| <ul style="list-style-type: none"><li>Developed a MERN stack based hospital scheduling system with a QR-based attendance feature to optimize doctor appointments and track presence.</li><li>Used logistic and linear regression models to predict patient diseases, allocate slots, and estimate waiting times.</li><li>Enabled automated scheduling, conflict minimization, and real-time doctor suggestions based on symptoms and slot availability.</li></ul>                                   |                       |

EXTRACURRICULAR ACTIVITIES & CERTIFICATIONS

- Deloitte Australia Data Analytics Simulation: Completed data analysis and forensic tech simulation, built a Tableau dashboard, and classified data in Excel.

February 2025
- Hackathon Winner: Secured 1st place in a hackathon organized by NGIT for developing an e-commerce platform integrated with Agentic AI.

December 2024
- Project Expo Winner: Achieved 1st place for presenting the project (Optimization of Doctors Availability to Reduce Patient Wait Time) at NGIT Techtonic Event.

April 2024
- Smart India Hackathon: Awarded 2nd Runner-Up in the internal round of the prestigious Smart India Hackathon at NGIT.

September 2024
- National-Level Hackathon: Competed in HackXcelerate at CBIT, Hyderabad, demonstrating problem-solving and teamwork skills.

April 2024
- Event Organizer: Planned and executed cultural events in school and college, highlighting organizational and leadership abilities.

2022 - Present

OTHER WORK

- Developed a Convolutional Neural Network (CNN) using NumPy to demonstrate forward and backward propagation in CNNs (along with Pooling and Activations) and trained it to classify MNIST digit images.
- Explored the working of Language Models and Transformers; studied U-Net model for object detection.
- Implemented Retrieval-Augmented Generation (RAG) to query documents, enabling efficient information retrieval and response generation.

ADDITIONAL INFORMATION

Skills marked with an asterisk (\*) indicate ongoing learning: ANN (Artificial Neural Networks), CNN (Convolutional Neural Networks), RAG (Retrieval-Augmented Generation), NGIT (Neil Gogte Institute of Technology)
